

Recycling of Construction Debris

We are all growing more aware of the environmental impact of our actions. You may be interested to know that you can reduce the environmental impact of your construction or demolition project by recycling the resulting debris rather than just taking it to a landfill. There are several operations in our area that accept construction debris for recycling at prices that are competitive with landfill fees. The closest landfill to the Township is the LanChester Landfill at Narvon, which is nearly twenty miles from the Exton crossroads and has a tipping fee of \$72.00/ton at this writing. When transportation costs are taken into account, you may find that recycling will cost you *less* than going to the landfill. We are providing you with this list of recyclers as an informational item and is not an endorsement of any operation shown. If you know of other recycling centers that accept construction debris and are convenient to the Township, please inform our Staff and we will be happy to add them to this list. Prices are provided for comparison only: they are accurate as of September 2009, but you should call to confirm pricing before taking any debris for recycling.

PROVIDER	ADDRESS	TELEPHONE	MATERIALS ACCEPTED	DISTANCE*	COST per TON
Cedar Hollow Recycling	100 Paradise St. Phoenixville, PA 19460	610-983-0193	used concrete and asphalt	12.2 miles	call for pricing
